What Is It All About?

Bjorna Hancock is a horse trainer by day and small town diner waitress by night. When her cousin goes missing while hiking in the mountains around Silver Falls, she takes it upon herself to assemble a search party. While Bjorna only asked a handful of town locals to help, other people surprisingly turn up to join the search party. Steely eyed and heavily armed, do these locals know something that Bjorna doesn't? Equipped with only a flashlight and a TechPad, a smart phone with a range of useful apps, Bjorna might just end up discovering what really happened to her missing cousin.

White Inside Its Umbra is the perfect entry point for gamers who have not yet ventured into Silver Falls. As with all other titles in the series, no prior knowledge of other Silver Falls stories is needed to enjoy White Inside Its Umbra. Players who are familiar with Silver Falls will be rewarded with a massive amount of lore, character, and story to explore.

Story Mode offers various control styles and difficulty levels. Weapons, resources, and collectible items are scattered all around the open world environment. A 2nd player can even operate a Wii Remote to control another flashlight to cast a light against the darkness of the environment.

The Wii U GamePad allows players to control secondary functions of the Wii Remote, turning the flashlight into a metal detector, or even a UV light based weapon in emergencies. The GamePad even has a camera that can detect enemies normally invisible to the naked eye. Much like ammunition, players will have to manage the battery power of this "TechPad" smart device and Flashlight. Some enemies may not even be affected by normal weapons. Players may get lost while wandering through the thick foliage and will need to use the GPS map to find their way. Players can even take a break from the horror by playing a mobile game or two on the GamePad.

Frontier Hunters is a second game mode which blends classic arcade light-gun shooter gameplay with RPG elements. Up to 4 players can use Wii Remotes to fight hordes of enemies while one player uses the GamePad to reload weapons for the other players. Complete missions to earn EXP to level up character stats, earn new weapons, and equip skills using special items called Skill Spokes. Even the GamePad player has their own set of stats and skills to level up.

The Silver Falls Series

Taking place about six months before Silver Falls – 3 Down Stars (New Nintendo 3DS), White Inside Its Umbra opens up the world of Silver Falls in ways never before seen in the series.

White Inside Its Umbra brings a new style of gameplay to the Silver Falls series, with its open world first person exploration, while making the most of the GamePad's unique strengths. Stepping past the subtle, understated horror that players first enjoyed in 3 Down Stars in 2019, Umbra offers an experience that no console other than the Wii U can provide.

Each title in the Silver Falls series offers new stories and different gameplay genres. Each title brings new unique gameplay elements to the series, so players will never be able to guess what will happen next!

Connect To Silver Falls Titles

Silver Falls – White Inside Its Umbra is the sixth official title, following Ghoul Busters (3DS) and Undertakers Guardians and Metal Exterminators (New 3DS). By connecting to other titles in the Silver Falls series, players can unlock exclusive new content such as new playable characters. Upcoming Silver Falls titles will also connect to existing titles to offer new and exclusive content.

Players who have favorite characters from other Silver Falls titles may likely see those characters playable in the Frontier Hunters mode via the built-in Code Linker system.

Try Silver Falls

Players interested in checking out what Silver Falls is all about can try 2 games in the series for FREE!

Silver Falls – Galaxy Bound Curse is an Action RPG launched in 2020, created for the actual original Nintendo GameBoy!
